

Phase 1 core model + Phase 2 future analytics • version-aware historical design

PK = Primary Key
FK = Foreign Key
UQ = Unique
1 = One
M = Many / crow's-foot equivalent
Dashed = future conceptual relationship

- Dates use YYYY-MM-DD.
- Locked/finalized reports are read-only except authorized unlock.
- President, VP1, VP2, Technology Chair can lock/unlock.
- QuestionVersion preserves historical answer accuracy.
- ReportTemplateVersion preserves exact historical template composition.
- Attachments live outside DB; storage reference is retained.

1. Template v1 uses Q1v1, Q2v1, Q3v1.
2. Q2 wording changes → create Q2v2; Q2v1 remains.
3. Create Template v2.
4. ReportQuestion(v2) → Q1v1, Q2v2, Q3v1.
5. New Reports use v2; old Reports remain on v1.
6. Answers remain tied to the exact QuestionVersion.

- Chair: create/update chaired committee reports; others view-only.
- President, VP1, VP2, Technology Chair: full access + lock/unlock.
- UserRole = chapter-wide authority.
- UserCommittee = membership/role history.

Future analytics consumes Phase 1 data without changing historical records.

Dashboard 1:M DashboardWidget.
 SavedReport belongs to User.
 DataSource describes internal/external sources.

Dashed links are conceptual, not foreign keys.

PRESIDENT • VP1 • VP2 • TECHNOLOGY_CHAIR •
