KEY (LEGEND)

- PK Primary Key
- FK Foreign Key
- UQ Unique
- 1 One
- 0..* Zero or Many

NOTES: ACCESS MODEL

- Users log in with their unique email.
- UserRole defines chapter-level permissions.
- UserCommittee assigns users to committees with a role and effective dates.
- Committee Chairs can create/update reports for the committees they chair.
- Members can view their own committees and other committees (view-only by default).
- PRESIDENT, VP1, VP2, and Technology Chair have full access across all committees, including the ability to lock/unlock reports.
- Locked reports are read-only for all users (enforced at application and API level).

NOTES: QUESTION VERSIONING

- A new row is created in Question when the wording or type of a question changes.
- Answers reference both question_id and version to preserve historical accuracy.
- Reports use the specific question version that was active at the time of creation.
- Phase 2 reporting can analyze answers across multiple versions of the same question_id.

GENERAL NOTES

- All dates are stored in YYYY-MM-DD format.
- Y/N fields use Y for Yes and N for No.
- Created_at and Updated_at store timestamps for audit purposes.
